EDUCATION

Washington University in St. Louis, McKelvey School of Engineering - Cumulative GPA: 3.94 St. Louis, Missouri
Bachelor of Science, Computer Science December 2027

Honors/Awards: Dean's List (All Semesters)

Relevant Coursework: Analysis of Algorithms, Data Structures & Algorithms, Intro to Computer Science, Linear Algebra, Mobile App Development, Web Development, Object-Oriented Software Development

PROFESSIONAL EXPERIENCE

PayPal San Jose, California
Software Engineering Intern May 2026 – August 2026

- Architected and developed an enterprise MCP server using Python and FastMCP, enabling AI agents to access and interact with internal risk review backend services
- Designed and implemented 10+ Java Spring Boot backend APIs with advanced MySQL/JPA filtering to allow AI agents to search, retrieve, and interact with 25,000+ risk review records through authenticated MCP tools
- Implemented role-based SSO authentication for 40+ MCP server tools, restricting access to sensitive risk review data based on user permissions
- Built AI-powered analysis pipelines that automate review workflows across 10,000+ internal product change requests

Mastercard O'Fallon, Missouri
Software Engineering Intern June 2025 – August 2025

- Integrated 3+ SaaS APIs (Confluence, ShareFile, Jira, etc.) into Mastercard's ServiceNow platform, enabling seamless data exchange and centralized access to internal tools
- Co-developed ServiceNow-based Mastercard Workbench, a dashboard that aggregates SaaS notifications and tasks, improving productivity for 50,000+ users
- Built Python scripts and ServiceNow MID server connections to securely connect Mastercard Catalog to ServiceNow
- Automated ingestion of Excel datasets into ServiceNow using SQL transform rules, cutting manual processing time by 80%

WashU STEM Association St. Louis, Missouri
Software Engineer August 2024 – Present

- Launch cross-platform Flutter app for WashU Chemistry Tournament (WUCT), improving communication for 150+ members using iOS push notifications and Firebase Messaging
- Streamline event management with Firestore and Riverpod state management, enabling personalized scheduling and profiles
- Enhance event registration efficiency for 500+ weekly users by updating website logistics system in JavaScript

Washington University in St. Louis - Introduction to Computer Science St. Louis, Missouri
Teaching Assistant January 2024 – January 2025

- Led weekly studio session groups assisting 100+ students with programming exercises in Java, improving class average by 10%
- Guided students in applying software testing principles with JUnit to validate and debug programming assignments

PROJECTS

Live Lecture Companion | Swift, Deepgram, Core Data, Storyboard October 2024 – December 2024

- Piloted an iOS lecture assistant app to transcribe and summarize lectures in real time, enabling 95+ users to revisit missed concepts
- Utilized multithreading to send audio to a student-developed LLM for insight extraction without interrupting live audio capture
- Reduced latency by ~25% by implementing batching and audio cleanup, improving live usability for up to 60-minute sessions

Friends360 | TypeScript, React, Node.js, Express.js, MongoDB, React Query June 2024 – August 2024

- Created a full-stack web platform for friend map-tracking, plan making, and instant messaging via Stream API
- Enabled nearby plan recommendations using Google Places API with real-time location streaming via WebSocket on Google Maps

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, SQL, Dart, Swift, HTML, CSS

Frameworks: React, Spring Boot, Flutter, TypeScript, Node.js, Express.js, JUnit

Developer Tools: ServiceNow, MySQL, MongoDB, Firebase, Git, Claude Code, Postman, Heroku, VS Code, IntelliJ

Concepts: Agile, AI-Assisted Development, Multithreading, Model Context Protocol, MVC Architecture
